- Security & Pentest

> PROFILE

I am Android Developer and UI/UX designer. I cleared my academics with throughout distinction. I teach programming and contribute to the open-source tools when time permits. I do UI/UX designing for my open-source projects as well. Also, I have my own collection of useful open-source projects aimed to Android, Security, Bots, Web and much more. I love reading books, playing online FPS shooter games and watch movies in weekends. I also write blogs here: slothiesmooth.dev

> PROFESSIONAL EXPERIENCE

Senior Android Developer

Alopa Infotech | Bangalore | Feb-2021 – Present

I am currently working at Alopa Infotech as senior android developer and mentoring 5 colleagues. We have our foot in medical sector. I have been working on these two fronts,

- Developing highly scalable Android app with a clean code. Also managing CI/CD pipelines for android for in-house Jenkins. Reviewing codebase was also crucial thing to make sure we deliver the best performing app while maintaining a decent quality codebase.
- Mentoring five of my colleagues with latest Jetpack components and teaching advanced Kotlin concepts and how to easily implement them in codebase.

Android Developer

Bosleo Technologies Pvt Ltd | Valsad | Aug 2019 – Feb 2021

I was working with Bosleo since August - 2019. I learnt many things at this organization. Mainly I worked with Medical sector apps and co-developed a huge product that aims to veterinarian and animals. Also, I did work on some other projects related to Maps and Rescue.

> PROFESSIONAL EXPERIENCE

Contributing to open-source and pet projects

2017 – Present

I have been working on my shower thoughts as open-source projects. I keep exploring different technologies and contributing to different open-source projects in my free time with fixes or new feature set. All the ideas I work with is 100% open-source and can be found at <https://gitlab.com/technowolf> These repositories contains Android Libraries, Android Apps, Node.js back-ends, Bots, Security tools and much more.

> OPEN - SOURCE PROJECTS

Troy Bot

Troy is a bot developed in Node.js.
